

Responsive Design

DEADLINE: 23/04/2022

FOLDER STRUCTURE

```
FL19_HW5/*
├─ task/**
├─ homework/*
│   └─ css/*
│       └─ style.css*
├─ img/*
│   └─ images...*
└─ index.html*
```

* - required

** - restricted (no need to submit)

TASK

In this homework, you have to create an HTML page template according to provided design, which you can find in the folder 'design'. There are three designs for desktop, tablet, and mobile. You can use flex or grid and media queries. All required images you can find in the folder 'img'. All text content you can find in the file 'content.txt'. Use HTML5 semantic tags where they are needed. All your styles should be written in the file 'style.css'.

FONTS AND COLORS

Use these fonts:

font-family: system-ui, sans-serif;

#000 – text

#e2ba7b – table border

#65aa44 – selected text

#f5f5f5 – footer

#D3D3D3 – shadow

#808080 – news date

Feel free to use any tool which will help you to pick the right color. Colors should be as close to design as possible.

RESTRICTIONS

- Do not use any CSS framework for this homework (e.g. Bootstrap, Materialize)
- Using JS is forbidden
- Do not use preprocessors in this homework

BEFORE SUBMIT

- Remove all unnecessary files that you might have included by mistake
- Format the code, and remove unnecessary lines of code
- Verify that the name of the folders and files meet the requirements
- Validate HTML(<https://validator.w3.org/>) and CSS (<https://jigsaw.w3.org/css-validator/>)

SUBMIT

- The **FL19_HW5** folder without **task** folder should be uploaded to GitLab repository “**FL-19**” into **main** branch
